Coalition loyalty program

For a solution that covers multiple businesses, you can utilise a coalition loyalty program. This is a loyalty points program that is used across several different retailers, with customers earning points by shopping at each participating merchant. When they've accumulated enough points for a reward, they can redeem their points at any of the participating companies, or you can offer your own rewards. It is a flexible solution for dealing with multiple tenants.

EASY TO OPERATE

Our loyalty infrastructure lets a large number of different sites easily sign up to your loyalty platform, giving them control over their own rewards. You can have as much or as little direct control as suits your organisation, and still reap the benefits of a loyalty solution.

EPOS INTEGRATION

Loyalty solutions should be simple for both you and your customers. That's why we provide complete integration with your existing ePOS systems for a frictionless customer experience and valuable insights for data-driven brands.

LOYALTY

Run a unified loyalty program across multiple businesses, with out-of-the-box analytics to help you assess performance and multi-level user management so you can decide permissions per administrator. Offer venue-specific rewards and manage availability exactly how you want it.

LET US WORRY ABOUT THE TECH

You know what you do best and loyalty technology isn't it. Let us take care of the technology so that you can focus on your customers.
